SUMMARY

Backend Engineer with hands-on experience in Python-based system design, LLM evaluation, and adversarial testing, building RESTful APIs and ML-powered applications using FastAPI, SQL, and modern AI frameworks.

EDUCATION

K.R. Mangalam University

B.Tech - Computer Science and Engineering — CGPA - 8.22

2023 – Present

Sohna, Gurugram, Haryana

EXPERIENCE

Ethara AI

February 2026 - August 2026

Role - LLM Post Training Intern

Gurugram, Haryana

- Evaluated 70+ multi-turn LLM conversations across reasoning, alignment, and response quality.
- Built 20+ multimodal adversarial test suites across image, audio, documents, and structured data, targeting 40% induced failure.
- Analyzed 50+ model outputs to identify failure modes and quality degradation patterns.
- Led QA for a 30-tasker team, reviewing daily outputs for correctness, consistency, and evaluation standards.

Unified Mentor Pvt. Ltd.

June 2025 - September 2025

Role - Web Developer Intern

Gurugram, Haryana

- Built 6 full-stack applications, delivering 25+ core features across appointment booking, catering, and order-management platforms.
- Designed normalized MySQL schemas with 8+ tables and 15+ REST APIs, implementing RBAC, CRUD, scheduling, and conflict resolution.
- Developed responsive frontends with HTML, CSS, and JavaScript, integrated with Flask/Python backends and database workflows.
- Debugged and tested 6 applications, resolving 30+ functional issues and managing version control through Git/GitHub.

PROJECTS

DropDock | [React](#), [FastAPI](#), [PostgreSQL](#), [SQLAlchemy](#), [Backblaze B2](#)

Live | **GitHub**

- Built a full-stack file and text sharing platform with auto-expiring drops and link-based access.
- Developed async REST APIs with expiration, view-once access, password protection, and rate limiting.
- Integrated cloud object storage with Backblaze B2 and MinIO for local development.
- Deployed the production application on Vercel and Render with responsive cross-device support.

Music Recommendation System | [Python](#), [Javascript](#), [scikit-learn](#), [TensorFlow](#), [Streamlit](#)

GitHub

- Built a music recommendation system using machine learning on a 1M+ song Kaggle dataset.
- Preprocessed audio metadata and engineered features in Jupyter to improve recommendation accuracy.
- Built an interactive Streamlit web application for real-time personalized music recommendations.
- Implemented recommendation pipelines using Scikit-learn and TensorFlow for efficient model inference.

SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frontend: React, HTML, CSS

Backend: FastAPI, Flask, SQLAlchemy, REST APIs, Pydantic, AsyncIO, JWT, OAuth 2.0

AI/ML: PyTorch, Hugging Face Transformers, LangGraph, RAG, Embeddings, Tool Calling, LLM Evaluation

Databases: PostgreSQL, Redis, pgvector

Cloud & DevOps: Linux, Docker, Docker Compose, AWS, Git, GitHub, GitHub Actions, CI/CD, Nginx

CERTIFICATIONS

- Bootcamp on Big Data & Data Science - C-DAC Noida (2024)
- Gen AI Academy - Google (2025)
